

CommunityCare

Conserve. Connect. Inspire.

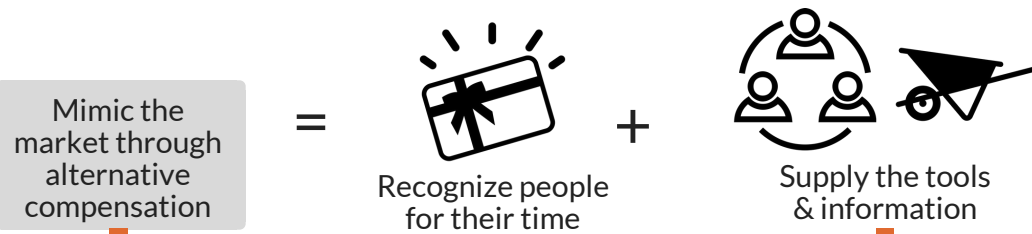

The Challenge:

Not enough resources to proactively maintain green and open spaces, resulting in overgrown, unsafe, and inactive lots.

Adapt the System

Train and compensate residents for green space work through (for example) stipends, discounts, vouchers, gift cards, etc.

Grow the Network

Incentivize long-term investment in community green space and offset the barriers to participation.

Long-term Stewards

The Result:

A low-cost, scalable, and sustainable stewardship model. Achievable when residents are equipped with the tools, training, and incentives to make long-term investments in their communities.
